

BACHELOR OF DENTAL SURGERY- I YEAR**GENERAL HUMAN PHYSIOLOGY & BIOCHEMISTRY**

TEACHING HOURS: 310 Hrs.

THEORY: 120 +70

PRACTICAL:60+60

I. Objectives**(a) Knowledge**

At the end of the course, the student will be able to:-

1. Explain the normal functioning of all the organ systems and their interactions for well coordinated total body function.
2. Assess the relative contribution of each organ system towards the maintenance of the milieu interior.
3. List the Physiological principles underlying the pathogenesis and treatment of disease.

(b) SKILLS

At the end of the course, the student will be able to:-

1. Conduct experiments designed for the study of physiological phenomena.
2. Interpret experimental and investigative data.
3. Distinguish between normal and abnormal data derived as a result of tests which he/she has performed and observed in laboratory.

(c) INTEGRATION

At the end of the integrated teaching the student shall acquire an Integrated knowledge of organ structure and function and its regulatory mechanisms.

II. Text BooksGuyton; Text book of Physiology, 9th edition.Ganong; Review of Medical Physiology, 19th edition Vander; Human physiology, 5th editionChoudhari; Concise Medical Physiology, 2nd editionChatterjee; Human Physiology, 10th edition.A.K. Jain; Human Physiology for BDS students, 1st edition.**BOOKS FOR REFERENCE:**

- i) Berne & Levey; Physiology, 2nd edition
- ii) West-Best & Taylor's, Physiological basis of Medical Practise, 11th edition

EXPERIMENTAL PHYSIOLOGY:

- i) Rannade; Practical Physiology, 4th edition
- ii) Ghai; a text book of practical physiology
- iii) Hutchison's; Clinical Methods, 20th edition

SYLLABUS**III. Course Contents Theory****1. General Physiology**

1. Homeostasis: Basic concept, Feedback mechanisms
2. Structure of cell membrane, transport across cell membrane
3. Membrane potentials

2. BLOOD:

- Composition & functions of blood.
- Specific gravity, Packed cell volume, factors affecting & methods of determination. Plasma proteins - Types, concentration, functions & variations.
- Erythrocyte - Morphology, functions & variations. Erythropoiesis & factors affecting erythropoiesis. ESR- Methods of estimation, factors affecting, variations & significance.

- Hemoglobin - Normal concentration, method of determination & variation in concentration. Blood Indices - MCV, MCH, MCHC - definition, normal values, variation.
- Anemia - Definition, classification, life span of RBC's destruction of RBC's , formation & fate of bile pigments, Jaundice - types.
- Leucocytes : Classification, number, percentage, distribution morphology, properties, functions & variation. Role of lymphocytes in immunity , leucopoiesis life span & fate of leucocytes. Thrombocytes - Morphology, , number, variations, function & thrombopoiesis.
- Haemostasis - Role of vasoconstriction, platelet plug formation in haemostasis, coagulation factors, intrinsic & extrinsic pathways of coagulation, clot retraction.
- Tests of haemostatic function, platelet count, clotting time, bleeding time, prothrombin time - normal values, method & variations. Anticoagulants - mechanism of action. Bleeding disorders.
- Blood groups: ABO & Rh system, method of determination, importance, indications & dangers of blood transfusion, blood substitutes.
- Blood volume: Normal values, variations.
- Body fluids : distribution of total body water, intracellular & extracellular compartments, major anions & cations in intra and extra cellular fluid.
- Tissue fluids & lymph : Formation of tissue fluid, composition, circulation & functions of lymph. Oedema - causes.
- Functions of reticulo-endothelial system.

3. MUSCLE AND NERVE

Classification of nerves, structure of skeletal muscle - Molecular mechanism of muscle contraction, neuromuscular transmission. Properties of skeletal muscle. Structure and properties of cardiac muscle & smooth muscle.

4. DIGESTIVE SYSTEM :

- Introduction to digestion :General structure of G.I. tract, Innervation.
- Salivary glands: Structure of salivary glands, composition , regulation of secretion & functions of saliva.
- Stomach: Composition and functions of gastric juice, mechanism and regulation of gastric secretion. Exocrine Pancreas - Structure, composition of pancreatic juice, functions of each component, regulation of pancreatic secretion.
- Liver : structure , composition of bile, functions of bile, regulation of secretion – Gall bladder : structure, functions.
- Small intestine - Composition, functions & regulation of secretion of intestinal juice. Large intestine - Functions.
- Motor functions of GIT: Mastication, deglutition, gastric filling & emptying, movements of small and large intestine, defecation.

5. EXCRETORY SYSTEM :

- Structure & functions of kidney, functional unit of kidney & functions of different parts. Juxta glomerular apparatus, renal blood flow.
- Formation of Urine : Glomerular filtration rate - definition, determination , normal values, factors influencing G.F.R. Tubular reabsorption - Reabsorption of sodium, glucose, water & other substances. Tubular secretion - secretion of urea, hydrogen and other substances.
- Mechanism of concentration & dilution of urine. Role of kidney in the regulation of pH of the blood.
- Micturition : anatomy & innervation of Urinary bladder, mechanism of micturition & abnormalities.

6. BODY TEMPERATURE & FUNCTIONS OF SKIN

7. ENDOCRINOLOGY

- General endocrinology - Enumeration of endocrine glands & hormones - General functions of system, chemistry, mechanism of secretion, transport, metabolism, regulation of secretion of hormones.
- Hormones of anterior pituitary & their actions, hypothalamic regulation of anterior pituitary

function. Disorders of secretion of anterior pituitary hormones.

- Posterior pituitary : Functions, regulation & disorders of secretion.
- Thyroid: Histology, synthesis, secretion & transport of hormones, actions of hormones, regulation of secretion & disorders, Thyroid function tests.
- Adrenal cortex & Medulla -synthesis, secretion, action, metabolism, regulation of secretion of hormones & disorders.
- Other hormones - Angiotensin, A.N.F.

8. REPRODUCTION

Sex differentiation, Physiological anatomy of male and female sex organs, Female reproductive system : Menstrual cycle, functions of ovary, actions of oestrogen & Progesterone, control of secretion of ovarian hormones, tests for ovulation, fertilisation, implantation, maternal changes during pregnancy, pregnancy tests & parturition, Lactation, composition of milk, factors controlling lactation, milk ejection, reflex, Male reproductive system :spermatogenesis, semen and contraception.

9. CARDIO VASCULAR SYSTEM

- Functional anatomy and innervation of heart Properties of cardiac muscle.
- Origin & propagation of cardiac impulse and heart block.
- Electrocardiogram - Normal electrocardiogram. Two changes in ECG in myocardial infarction. Cardiac cycle - Phases, Pressure changes in atria, ventricles & aorta.
- Volume changes in ventricles. Jugular venous pulse, arterial pulse. Heart sounds: Mention of murmurs.
- Heart rate: Normal value, variation & regulation.
- Cardiac output: Definition, normal values, one method of determination, variation, factors affecting heart rate and stroke volume.
- Arterial blood pressure: Definition, normal values & variations, determinants, regulation & measurement of blood pressure.
- Coronary circulation.
- Cardio vascular homeostasis - Exercise & posture.

10. RESPIRATORY SYSTEM

- Physiology of Respiration: External & internal respiration. Functional anatomy of respiratory passage & lungs.
- Respiratory movements: Muscles of respiration, Mechanism of inflation & deflation of lungs.
- Intra pleural & intra pulmonary pressures & their changes during the phases of respiration. Mechanics of breathing - surfactant, compliance & work of breathing.
- Spirometry: Lung volumes & capacities definition, normal values, significance, factors affecting vital capacity, variations in vital capacity, FEV & its variations.
- Pulmonary ventilation - alveolar ventilation & dead space – ventilation. Composition of inspired air, alveolar air and expired air.
- Exchange of gases: Diffusing capacity, factors affecting it. Transport of Oxygen & carbon dioxide in the blood. Regulation of respiration – neural & chemical.
- Hypoxia, cyanosis, dyspnoea, periodic breathing. Artificial respiration, pulmonary function tests.

11. CENTRAL NERVOUS SYSTEM

1. Organization of central nervous system.
2. Neuronal organisation at spinal cord level.
3. Synapse receptors, reflexes, sensations and tracts.
4. Physiology of pain.
5. Functions of cerebellum, thalamus, hypothalamus and cerebral cortex.
6. Formation and functions of CSF.
7. Autonomic nervous system.

12. SPECIAL SENSES

Fundamental knowledge of vision, hearing, taste and smell.
